Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-45 is/are pending in the application.

DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-3, 6-13, 21-23 and 29, drawn to a process to produce vanillin using *Pseudomonas putida*; and the deposited *P. putida* NCIMB40988 microorganism itself, as used in the method of this group.

Group II, claim(s) 4-5, 24-25, 30-31 and 34-44, drawn to a 2-step process to produce vanillin using (a) either *Pseudomonas putida* or *Rhodotorula glutinis* and (b) either *Aspergillus fumigatus* or *Micromucor isabellinus*; and the specific deposited microorganisms of claims 24-25, 30-31 themselves, as used in the method of this group.

Group III, claim(s) 14-20, 26-28 and 45, drawn to a process to produce vanillic acid using a microorganism of *Penicillium* or *Aspergillus*; and the specific deposited microorganisms of claims 26-28 themselves, as used in the method of this group.

Group IV, claim 32, drawn to a genetically engineered organism transformed with DNA.

Group V, claim 33, drawn to an enzyme or extract from the microorganism of Group IV.

The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I is a direct process to produce vanillin, using a particular genus of microorganism, Group II is a two-step process to produce vanillin, using 2 of 4 different listed microorganisms, and Group III is a process to produce vanillic acid. Each of the groups utilizes a different and patentably distinct genus of microorganisms, each with separate and distinct activities, yielding separate products for each group. Group IV is directed to a non-specified (micro)organism, which is transformed with a generic, non-specified set of DNA from one of the microorganisms used in groups I-III. This resultant microorganism would be structurally and functionally different from the microbes within groups I-III, and thus would represent a patentably-distinct invention. Finally, the extract or enzyme of Group V, is structurally and functionally different from the microorganisms themselves, and may be produced via natural isolation, rather than from genetic transformation and

expression. The extracts are not required in the processes of Groups I-III. Thus, there is no single linking inventive concept or corresponding special technical feature within each of the Groups I-V.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
